OBJECTIVES OF THE FORUM

Positioning the African continent as an attractive investment destination for investors and economic operators from other OIC regions and beyond. This Forum, which aims to contribute to the stability and prosperity of Africa, also aims to highlight the main investment opportunities, as well as the incentives and facilities granted to investors from Member Countries. It will, on the one hand, encourage investment flows between OIC countries, present investment projects of African countries, promote the exchange of national and regional experiences and, on the other hand, contribute to the financing of projects by regional financial institutions. Similarly, it will serve as a catalyst for the realization of investment intentions in structuring projects, thus stimulating investments in intra-OIC value chains.
